PROFESSIONAL SUMMARY

Software engineer with a Master's degree in Applied IT Techniques and a Bachelor's degree in Computer Science. Passionate about developing backend applications and native Android mobile applications.

TECHNICAL SKILLS

Languages: Java, PHP, C#, Python, SQL, TypeScript, Bash
Web & Software Engineering: Spring Boot, FastAPI, ReactJS, Microservices, Distributed Systems, System Design
Web Servers & Hosting: Nginx, Apache HTTP Server, Apache Tomcat 11 (Embedded), cPanel/WHM, DNS, SSL/TLS
AI Engineering: LLM APIs, Prompt Engineering, AI Workflow Automation, RAG
Cloud & Platform Engineering: Oracle Cloud Infrastructure (OCI), Docker, Linux (Ubuntu), Git, GitHub Actions, CI/CD, Terraform (IaC)
Security & Reliability: Spring Security, RBAC, JWT Authentication, Monitoring, Backup & Recovery, Grafana
Testing: Junit, Mockito, API Testing, Postman, Swagger UI

PROFESSIONAL EXPERIENCE

Backend Developer - Asociatia Oportunitati si Cariere | Oct 2026 – present

- Develop and maintain backend functionality using PHP, focusing on REST API endpoints and data processing.
- Implement API integrations to retrieve company information from external sources and index data in Apache Solr.
- Test and debug REST API endpoints using Postman, identifying and resolving backend issues.
- Implemented input validation, exception handling, and API testing to improve application reliability.
- Work with Docker for local development and troubleshooting application services.
- Collaborate using Git and GitHub, contributing through pull requests and reviewing automated test results.

Java Software Engineer - Dimitra International | Rome, Italy | Apr 2026 – Jun 2026

- Developed a full-stack CRM application for managing customer records, business contacts, and interaction histories.
- Designed RESTful APIs using Spring Boot and Spring Data JPA, implementing CRUD operations and relational database persistence with MySQL.
- Built a responsive React interface supporting customer search, record management, sales opportunity tracking, and dashboard reporting.
- Implemented input validation, exception handling, and API testing to improve application reliability.

Scheduling Analyst - SCC Services | Iasi, Romania | Dec 2025 – Apr 2026

- Analyzed billings, transactions, and pricing processes to identify discrepancies and ensure data accuracy
- Managed billing activities within defined monthly deadlines, ensuring timely completion of assigned invoice workflows

Technical Support & Web Developer - Workleto | Bucharest, Romania | Nov 2024 – Aug 2025

- Provided 1st line technical support within a SaaS environment through ticketing systems and phone, troubleshooting client issues while collaborating with internal teams to investigate and resolve technical issues.
- Worked with an internal CRM and Click Up to manage customer requests and prioritize tickets
- Developed and maintained clients websites, delivering new pages, frontend improvements, content updates, and issue resolution using HTML, CSS, and JavaScript.

Full Stack Developer - SMEDIX | Cluj-Napoca, Romania | Dec 2022 – Jan 2023

- Collaborated with a development team to build a full stack application using ASP.NET Web API, C#, SQL, and Angular within a Scrum/Agile environment.
- Contributed to both backend and frontend development while using Git for version control and team collaboration.
- Developed functionalities for managing medical devices, tracking their information and status, and supporting device related workflows.

Software Developer - Wayfare | Cluj-Napoca, Romania | Jul 2022 – Aug 2022

- Completed a software development internship focused on Progress OpenEdge and Angular in a professional development environment.
- Developed a full stack project for an online library

SELECTED TECHNICAL PROJECTS

Inventory Management System Java • Spring Boot • React • MySQL • Git • Docker Compose • OCI • Postman

- Designed and developed a full-stack inventory management platform with Spring Boot REST API, React/TypeScript frontend, and relational MySQL data model.
- Engineered core inventory and procurement workflows, including stock movements, purchase orders, automated inventory updates, and historical traceability.
- Built the persistence layer with Spring Data JPA/Hibernate, incorporating relational modelling, validation, custom queries, and business-rule enforcement.
- Containerized the application using Docker and Docker Compose, configuring networking and database persistence.
- Deployed a full-stack application on Oracle Cloud Infrastructure (OCI) using Docker Compose, with Nginx serving the React frontend and handling HTTPS traffic.
- Developed RESTful APIs using Java and Spring Boot with embedded Apache Tomcat 11, implementing JWT authentication, role-based access control, and MySQL integration.
- Configured container networking, SSL/TLS, automated database backups, and Linux resource monitoring.

Discover Jiu Valley - Android Tourism Application Java • Android SDK • MVVM • Room DB • REST APIs • FastAPI • AI Integration

- Designed and developed an Android tourism application using Java and MVVM architecture, covering multiple cities in the Jiu Valley and integrating tourism categories, interactive maps with hiking routes, community content.
- Integrated the OpenAI API through a Python FastAPI backend to develop an AI tourism assistant, enabling conversational guidance and responses to tourism related queries.

EDUCATION

- **Bachelor of Engineering**, *2024, University of Petroșani*, Romania, Computer Science, Final grade 9.63
- **Master of Engineering**, *2026, University of Petroșani*, Romania, Applied IT Techniques, Final grade 10
- **PhD of Engineering**, *2026 – present, University of Petroșani*, Romania, Systems Engineering, in progress

LANGUAGES

Romanian - Native | **English** - C1 Advanced | **German** - A1 Elementary
